EDUCATION

University of Queensland

Bachelor of Information Technology

Brisbane, QLD

Feb. 2018 – Dec. 2020

EXPERIENCE

Instructor

Junior Engineers

May 2019 – Sep 2019

Newmarket, QLD

- Taught programming to elementary and high school students
- Prepared teaching materials for the school term and holiday programs
- Managed classrooms of 10-20 students and assisted other instructors

R&D Software and Firmware Engineer

Agilent Technologies | C#, WPF, .Net, Angular.js, Typescript

Sep 2021 – Now

Melbourne, Australia

LDIR8700

Sep 2021 - Sep 2024

Particle imaging and identifying instrument using infrared laser

- Expanded functionality and maintained quality for the instrument's companion software
- Implemented an alternate scanning method to support a new sample holder design
- Improved various components of the software, including UI, database, and image processing
- Compensated for shortcomings in hardware and internal components by adapting the software

CARY3500

OCT 2024 - Now

Chemical analysis instrument using UV-Vis laser

- Added new features to the instrument's companion software to improve user experience
- Implemented new features to support the instrument's new hardware capabilities
- Developed custom Angular components to improve reporting capabilities
- Connected Angular components with the C# back end, database, and compliance microservice
- Maintained components of the software and kept the tech stack up to date

PROJECTS

2D Shooter Game | C#, Unity

May 2021 – May 2021

- 2D top down shooter game inspired by Alien Invaders in Unity and C#
- Managed and led a team of 3 to implement key gameplay mechanics and UI

2D Platforming Game | C#, Unity

May 2021 – May 2021

- 2D Platforming game built using Unity and C#
- Collaborated with a team of 6 to develop platforming levels, UI and sound system

Questionnaire generator | JavaScript, jQuery, SMART on FHIR, HTML/CSS

Aug 2020 – Nov 2020

- Developed an EMR plugin for medical workers and patients to better manage questionnaires
- Implemented questionnaire generation and form presentation from FHIR questionnaire format using jQuery
- Formatted response data in FHIR format to provide in-app feedback and support further use
- Received positive feedback from CSIRO and the UQ School of Medicine

TECHNICAL SKILLS

Languages: Java, Python, C, C#, SQL, JavaScript, HTML, CSS

Frameworks: WPF, Bootstrap, jQuery, Node.js, Express.js, Angular.js

Unit test frameworks: Selenium, MSTests, Moq, Microsoft Fakes

Developer Tools: Git, Github, Subversion, Docker, VS Code, Visual Studio, IntelliJ, Unity, Trello, Google Colab
